

KENTUCKY BLUEGRASS

PRAFIN

PRAFIN exhibits similar traits to all of the sub-compact midnight type family of varieties. Current data shows *PRAFIN* excels in this area and produces elite quality turf.

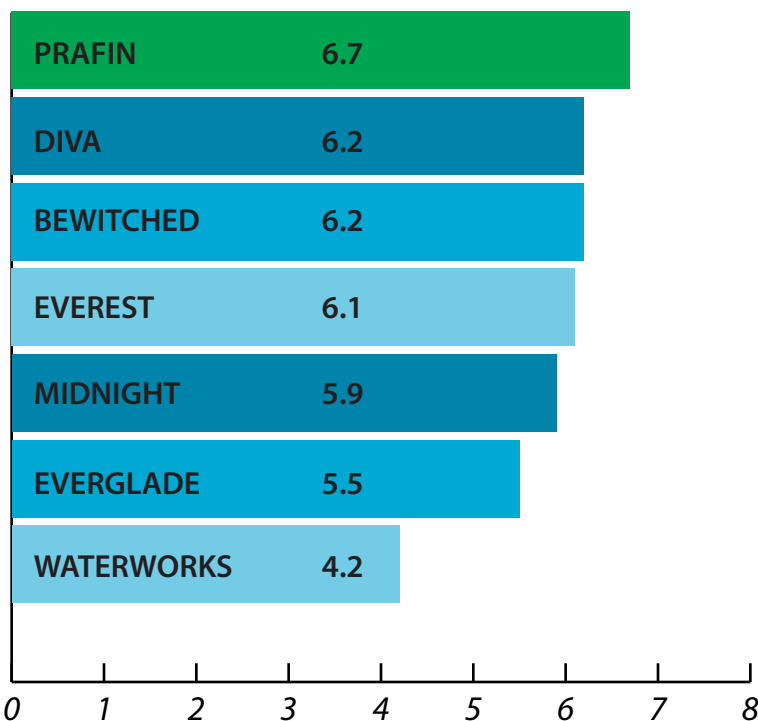

PRAFIN has strong overall disease resistance. It's ability to perform well under traffic and accept a ½" cut makes *PRAFIN* a superior product for golf courses, sod production, sports fields, and residential properties.

PRAFIN is exclusively sold in the EU by Semillas Fito and distributed by Columbia River Seed in Asia.
