

KENTUCKY BLUEGRASS

GLOBALLY SOWN

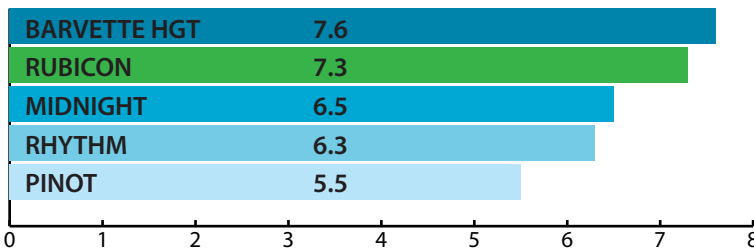

LOCALLY GROWN

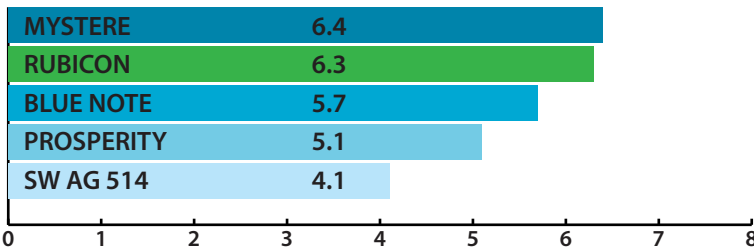

RUBICON is one of a few varieties that has the wear tolerance and density to be a true performer in the sports turf arena and ultra high traffic situations.

RUBICON is a very fine bladed variety that exhibits very good summer and fall density ratings. It has shown excellent disease resistance to red thread, leaf spot, and stem rust. It has shown to be one of the earliest in spring green up at multiple locations, and has consistently performed well under traffic stress.

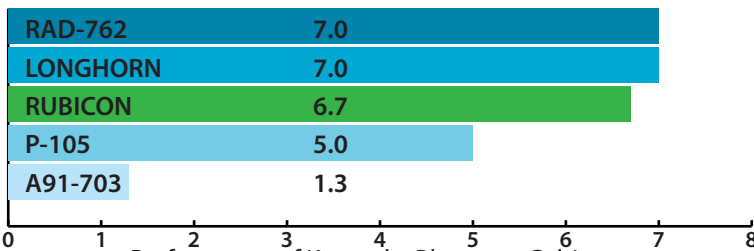

We are proud to offer this type of quality to our customers.
